VEGA

Vega is a UKCA and CE EN1891 certified whilst also being ANSI Z133 compliant. The light-weight arborist climbing rope, that boasts the lowest elongation currently on the market (1.2%). Designed specifically for the new generation of mechanical climbing devices and modern climbing techniques.

The braided polyester core provides extremely low elongation which ensures an easier and less exhausting climb, whilst the 24 plait polyester jacket gives the rope exceptional flexibility and handling without compromising on durability.

Type A Ropes

Type A ropes are suitable for general use in rope access, line rescue and speleology.

Type B Ropes

Type B ropes are of a lower performance than type A ropes, requiring greater care in use.

Vega meets and exceeds all requirements of type A, except the 'drop test dynamic performance', which is in accordance with type B requirements.
